

EUREKA! Scholars

Center for Science and Engineering Partnerships

Program Dates: June 23, 2025-August 15, 2025
(8 weeks)

Get paid for research!

Develop lab experience!

Workshops/Networking Events!

The Early Undergraduate Research Knowledge Acquisition (EUREKA!) program is designed to enrich the academic experience of undergraduates at the University of California, Santa Barbara in science, technology, mathematics, and engineering (STEM) disciplines early on in their educational careers. Scholars are provided with an invaluable opportunity to explore their discipline, experience a research environment, and improve their opportunities for future study in their chosen field. Scholars participate in an onboarding course in the Spring before their 8-week intensive summer research program experience and receive support finding a research lab.

Benefits:

- \$4,800 stipend for 8 week internship
- Spring 2025 onboarding class: *Practice of Science*
- Access to networking events
- Professional skill and presentation development
- Mentorship on graduate school opportunities

Requirements:

- Full time UCSB Freshman
- Science, Engineering, Mathematics majors
- US Citizen or permanent residence status
- May not enroll in summer courses during 8 week program
- No prior research experience needed
